

HOW TO ENHANCE YOUR STUDENTS' INFORMATION SKILLS?

Take a constructive alignment approach in integrating information skills within your courses and curricula

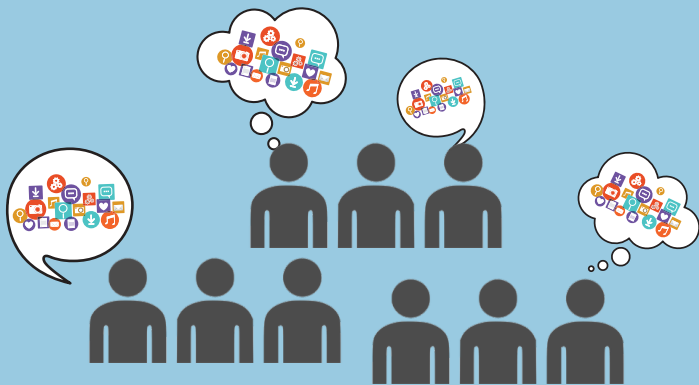

1: Promote self-directed learning when providing literature

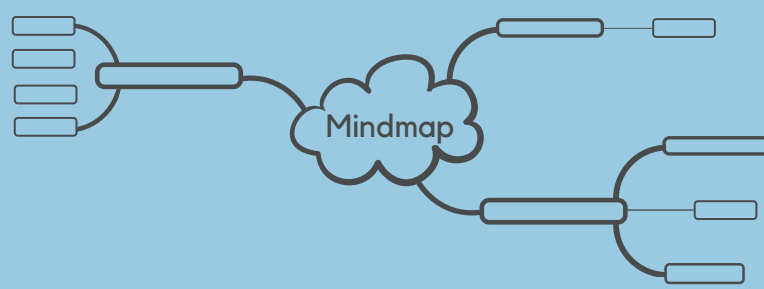

2: Encourage students to discover resources in various ways

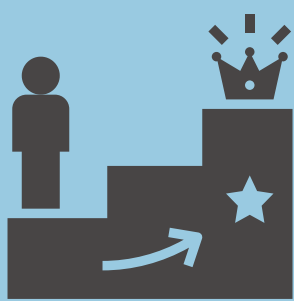

3: Increase focus on critical evaluation of information

4: Stimulate students to organize information

5: Provide appropriate levels of support in producing (academic) output

6: Teach students to create information in various formats and on multiple platforms

7: Use authentic assessment to measure how students use information for learning

8: Participate in information skills training as part of your continuing professional development

These recommendations are based upon a survey among UM students and teachers. Want to read more? Go to:
